

3 Year Warranty

The OilChef device is guaranteed in full for 3 years if the operating and maintenance instructions are followed:

1. Determining the new lowest frying temperature of fryer with OILChef
2. Accepting that food will be lighter and crispier in color
3. Focusing on food color and food quality *instead of* oil color/quality
4. Boiling out the unit at each new oil change

The OilChef is not a filter, it does not clean your oil. It's a technology which works at a molecular level to keep your oil alive for longer.

To guarantee 100% performance and continue your maximum possible efficiencies with energy, environmental impact, food waste, fryer cleaning materials, labor, cooking oil and other important bottom line attributes, not excluding possible increases in food sales, *we recommend making a calendar note to order your new replacement units after 33 months or 3 months before your warranty expires.*

Our units are virtually unbreakable, and the robust construction of the patented stainless steel protective housing will survive the busiest of professional kitchen and mobile kitchen environments. The Warranty clock starts ticking the first day you wet the OilChef unit with cooking oil.

Any warranty claims or concerns should be communicated by email to:
oilchef@oilchef.com

We reserve the right to validate any and all warranty claims and not limited to lab testing or any other means we determine for such verification.
